OIL & GAZ TRADING
WWW.ZETCO-KW.COM

About us:

Zetco Factory, based in Kuwait, is a versatile manufacturing, trading, and supplying company tailored to serve diverse industries worldwide. Specializing in the production of essential substances such as white spirit, turpentine oil, light oil, mineral oil, heavy oil, anti-collision products, refrigerants, antifreeze products, and other crucial liquids used in hydraulic fiber transmission, as well as compound chemical reagents for laboratories and diagnostics.

Registered commercial register no. 241455 and licensed by the Ministry of Commerce & Industry (License No. 472400) since December 13, 2022, Zetco Factory is dedicated to meeting industry needs with quality and compliance at the forefront of its operations.

Our Vision:

At Zetco, we are seeking to be the premier provider of essential substances, trusted by industries globally for our commitment to quality, innovation, and sustainability.

With a focus on meeting the diverse needs of every sector, we aim to drive progress and excellence in manufacturing, trading, and supplying, setting the standard for industry solutions and enriching communities worldwide.

Our mission.

Our Mission:

Our mission is to deliver quality products and services and satisfy the requirements of each client in an efficient, business-like, and friendly manner.

We strive to create a mutually beneficial environment for our Clients and Principals by providing high-added-value services and innovative solutions while maintaining our high standards of integrity and professionalism and constantly improving the quality of our work and services.

Our Values:

We strive to create a mutually beneficial environment for our Clients and Principals by providing high-added-value services and innovative solutions while maintaining our high standards of integrity and professionalism and constantly improving the quality of our work and services.

Industries Our Products:

Zetco's products are essential across various industries.

- Automotive:**

Our solvents and thinners contribute to manufacturing and maintenance processes.

- Specialty Chemicals:**

Zetco's compounds play a crucial role in formulating innovative solutions.

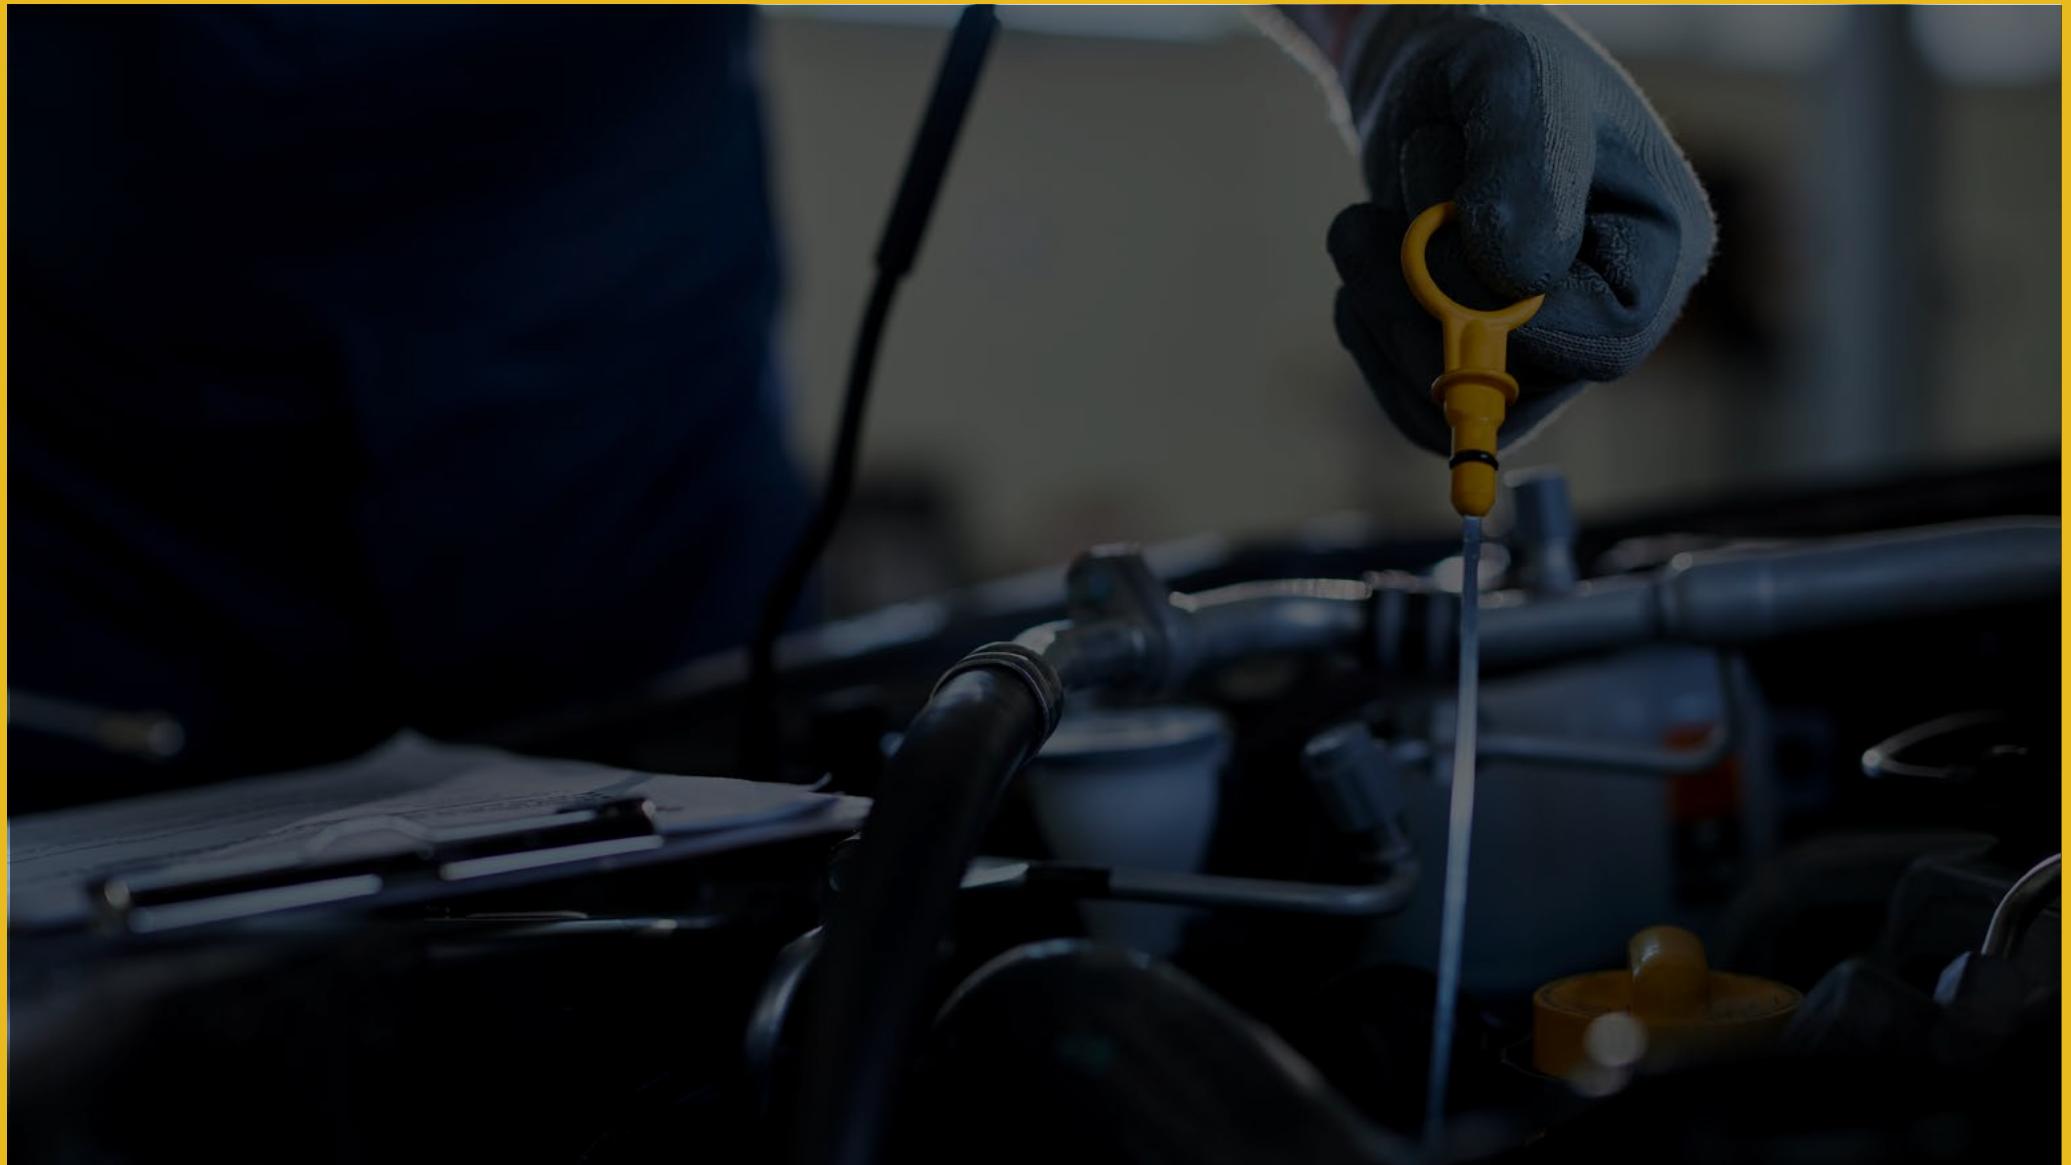

- Paint Industry:**

Essential substances from Zetco facilitate the creation of vibrant coatings and finishes.

- Industrial Laundry:**

Our products ensure optimal cleaning performance in commercial settings.

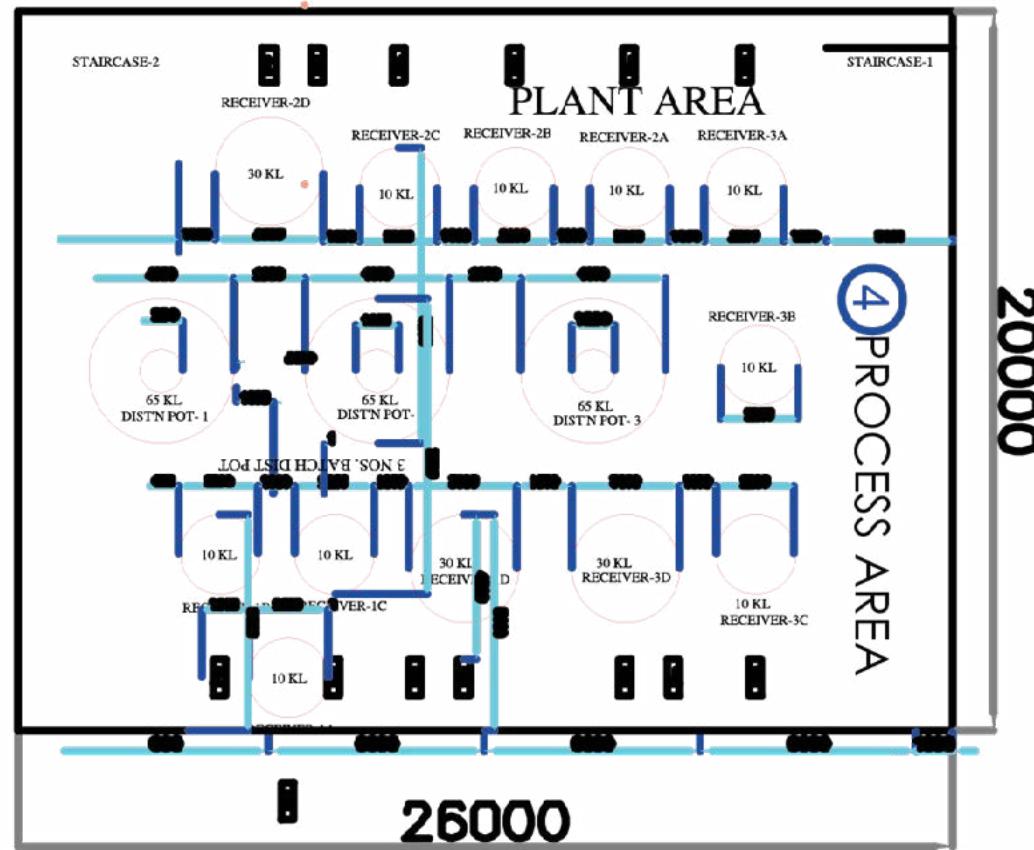

Zetco continues to be a trusted partner, providing high-quality solutions across various industries worldwide.

Refinery:

Zetco is on the stage of schedule the work for the state-of-the-art grassroots refinery. Located in Kuwait and Hamriyah free zone phase 2, Sharjah UAE. Close proximity to existing port infrastructure. Primary focus will be refining the crude oil.

This venture is targeted to produce a range of fuels and valuable semiproducts. Essential markets will encompass the Middle East, Africa, and Asia with an eye towards expanding into the European sector.

Tank Frame Storage:

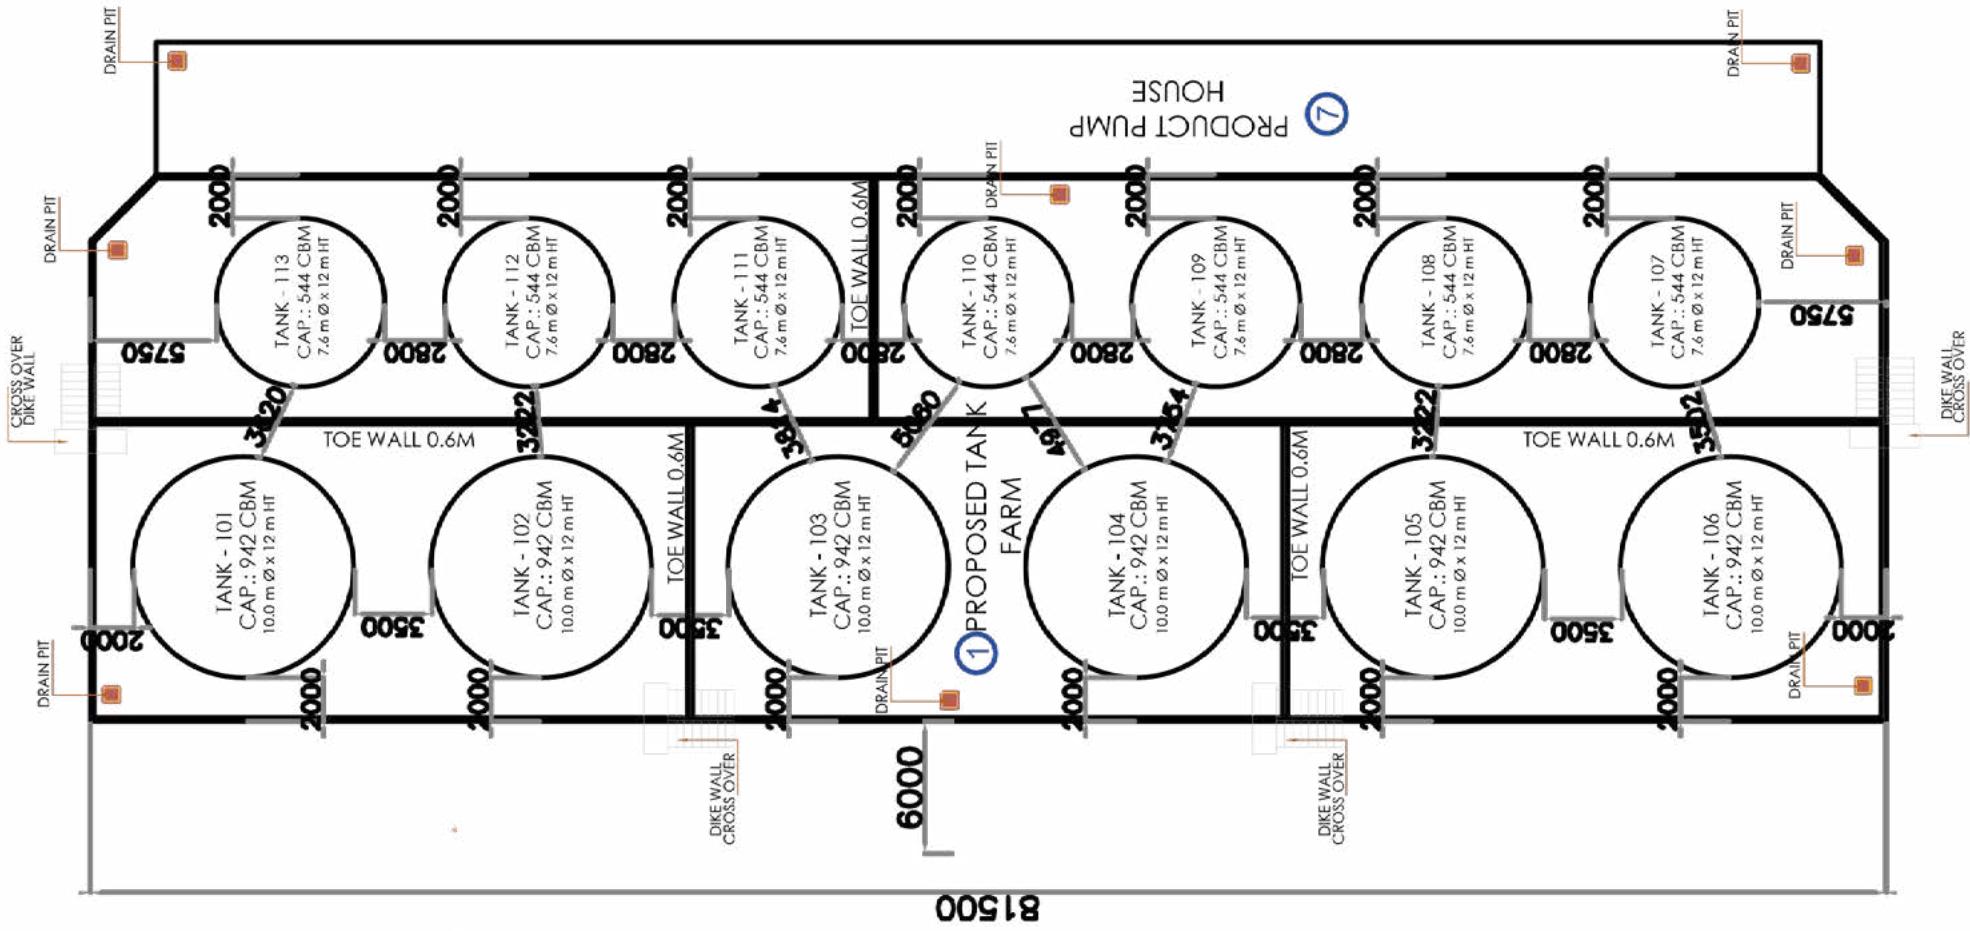

Zetco is set to build a new Tank Farm in Hamriah free zone phase 2, Sharjah UAE. The new Tank Farm will be situated alongside an existing Tank Farm.

The existing Tank Farm is a 17 tanks with a total capacity of 43,616 cubic meters allocated on the plot of 65,000 square meters. An additional plot area of 100,000 square meters with a focus on enhancing the facility's storage capacity. The primary goal is to achieve a total storage capacity of 600,000 cubic meters. The Tank Farm is exclusively designated for import, export, and blending.

The facility services cover storage, handling, repackaging, and related solutions specifically designed for petrochemicals.

The list of products are:

- Naphtha
- Diesel
- Gasoline
- Crude oil

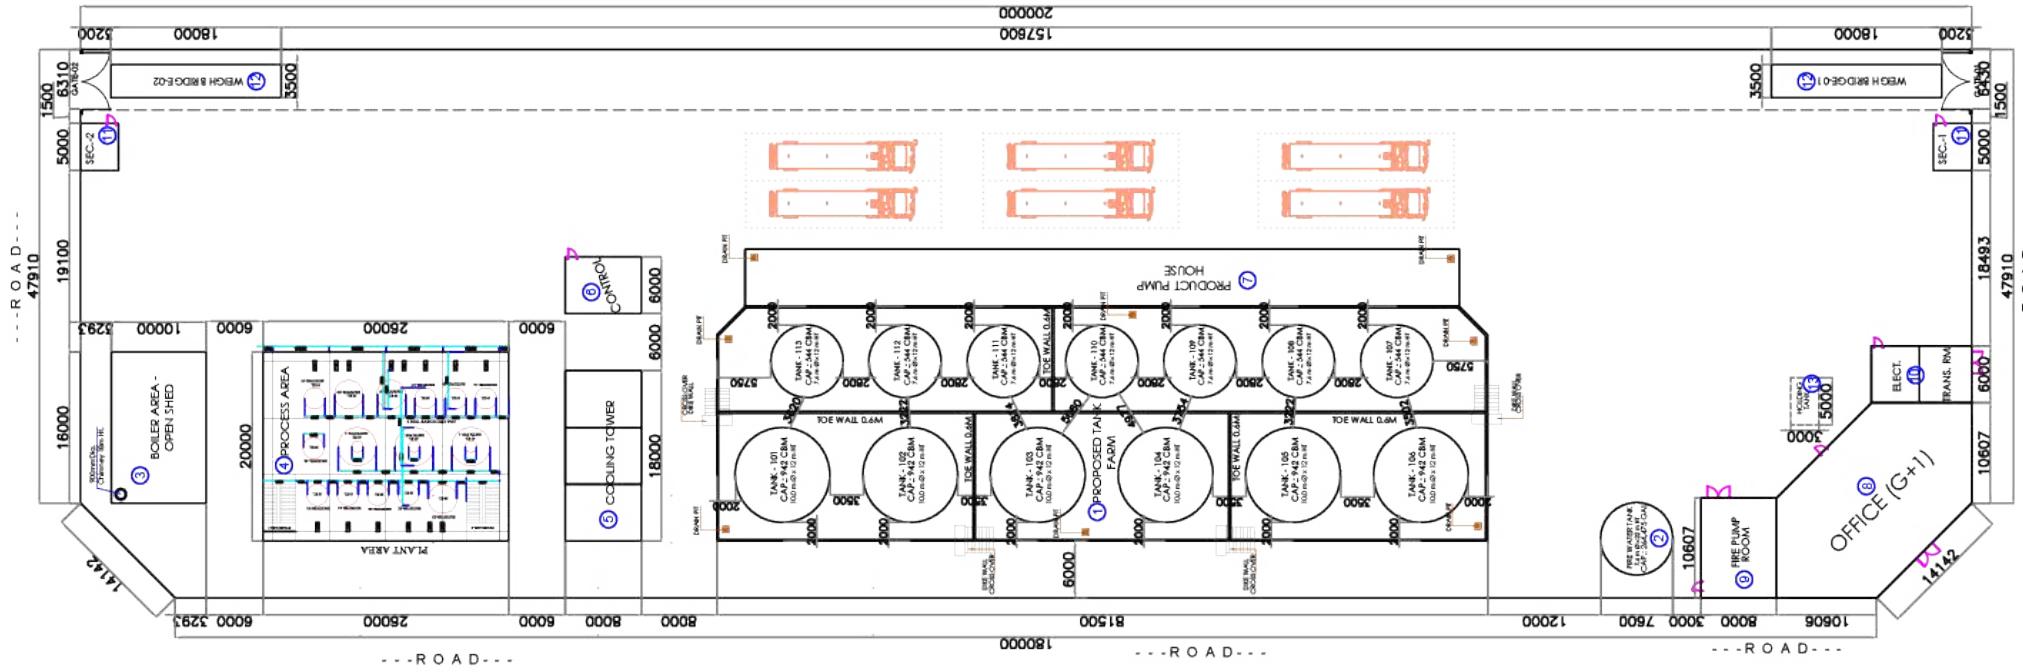

Existing Layout:

Total of 17 tanks were identified in the tankfarm area with capacities as given below. The tanks are manufactured as per API 650 in the year 2018. 15 nos. of tanks are made of Carbon Steel (ASTM A 36) and 2 nos. of tanks are made of Stainless Steel.

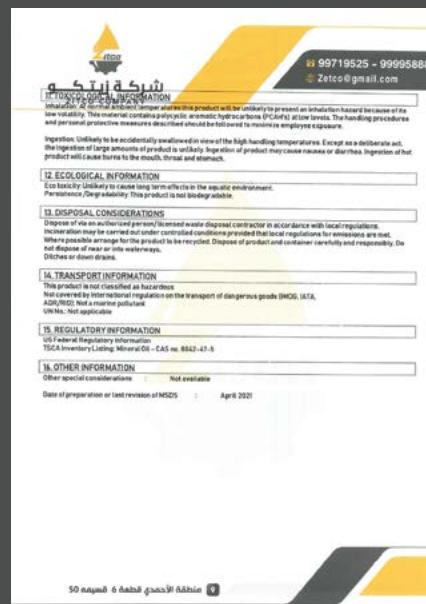

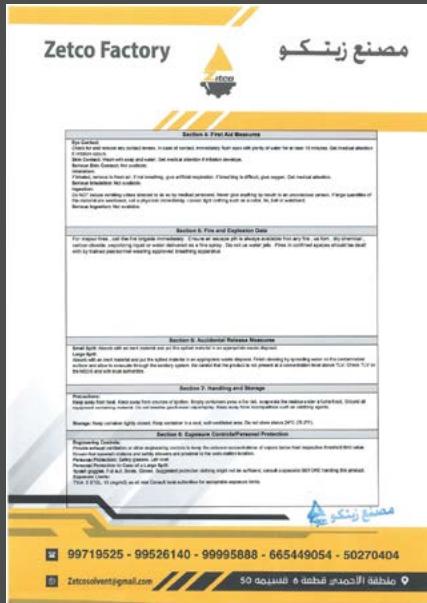

Tank Capacities:

- 10 X 1,768 cubic meters (2 Stainless Steel tanks)
- 5 X 2,896 cubic meters
- 2 X 5,728 cubic meters

Total capacity 43,616 cubic meters

<hr/> <p>5 FIRE-FIGHTING MEASURES</p> <p>EXTINGUISHING MEDIA</p> <p>Extinguish with water spray, foam, carbon dioxide, dry powder, sand, dolomite or other inert material.</p> <p>SPECIAL FIRE FIGHTING PROCEDURES</p> <p>Attack the fire with a stream of water or foam directed upwards exposed to flames with water until wet after the fire is out.</p> <p>UNUSUAL FIRE & EXPLOSION HAZARDS</p> <p>Vapours may form explosive mixture with air at room temperature. Vapours are heavier than air and may spread near ground or in low-lying areas.</p> <p>SPECIFIC HAZARDOUS</p> <p>Decomposition / combustion products include: Carbon monoxide (CO), Carbon dioxide (CO₂).</p> <p>PROTECTIVE MEASURES IN FIRE</p> <p>Wear self contained breathing apparatus and full protective clothing. Keep all unnecessary people away. Fire water runoff must not be allowed to contaminate ground or enter drains, sewers or water courses. Provide bonding against the water runoff.</p> <p>6 ACCIDENTAL RELEASE MEASURES</p> <p>PERSONAL PRECAUTIONS</p> <p>Wear protective clothing (see Section 8).</p> <p>ENVIRONMENTAL PRECAUTIONS</p> <p>Do not allow to enter drains, sewers or water courses. Cover oil stains and spills. Avoid spreading spilled material. Contain spillages with sand, earth or suitable inert absorbent material. Prevent further spillage if safe to do so. In the event of fire, contact your local fire service or relevant environmental Agency. Fire brigade and police.</p> <p>SPILL CLEAN-UP METHODS</p> <p>Absorb in vermiculite, sand, diatomaceous earth or other inert absorbent material. Place into clearly labelled container for recovery or disposal (see section 15). Rinse site with copious amounts of water, which should not be allowed into drains, sewers or water courses.</p> <p>7 HANDLING AND STORAGE</p> <p>USAGE PRECAUTIONS</p> <p>Avoid spilling, skin contact or eye contact. Use only with adequate ventilation. Do not breathe vapour or mist. Avoid contact with skin and eyes. Avoid breathing dust. Do not eat, drink or smoke when using this equipment. Use only electrical equipment suitable for explosive atmospheres.</p> <p>STORAGE PRECAUTIONS</p> <p>Store in a dry, well-ventilated, cool and dry location. The equipment must be bonded to avoid static discharge. Use only electrical equipment suitable for explosive atmospheres.</p> <p>SAFETY INFORMATION</p> <p>Always use personal protective equipment in a dry, cool and well-ventilated place. Keep away from heat, sparks and open flame. Keep away from food, drink and avoid breathing fumes. When away from existing materials, acids and bases or damp conditions.</p> <p>STORAGE CLASS</p> <p>None</p>

Name:	EID:	TWA - 8 hrs	STEL - 15 Min.
Hydrocarbons, C8-C12 + alkanes, isooctane, isooctane, glycols, isooctane (D 275)	MEL	350 mg/m3	
MEL - Maximum Exposure Limit.			
INHALATION COMMENTS			
WEL = Workplace Exposure Limits			
EXPOSURE CONTROLS/PERSONAL PROTECTION			
Provide adequate general and local exhaust ventilation.			
RESPIRATORY EQUIPMENT			
For handling vapours, use suitable respiratory protection must be provided.			
Seek advice and recommendations of the manufacturer or supplier of equipment.			
HAND PROTECTION			
Wear gloves. The employer must give conforming to EN 374. Seek recommendations from manufacturer or supplier. After using gloves the hands should be washed and thoroughly dried and a suitable moisturiser applied.			
EYE PROTECTION			
Wear safety glasses or goggles.			
OTHER APPROPRIATE CLOTHING			
Wear appropriate clothing to prevent any possibility of liquid contact and repeated or prolonged vapour contact.			
PROTECTIVE EQUIPMENT			
DO NOT SMOKE IN WORK AREA: Wash hands or the end of each work shift and before eating, smoking and eating using the toilet. Promptly remove any clothing that becomes contaminated. Wash promptly with soap & water if skin becomes contaminated. Use appropriate barrier cream to prevent drying of skin. When using do not eat, drink or smoke.

MOBILITY Moderately mobile liquid which may spread given a large surface area of water. The product has limited mobility in soil but will slowly migrate from the surface.			
DISCONTAMINATION Biodegradation is unlikely to be significant because of the low water solubility of the product.			
DEGRADABILITY Readily biodegradable.			
13 DISPOSAL CONSIDERATIONS			
GENERAL INFORMATION			
Do not allow to enter drains, waterways or reservoirs. Avoid release to the environment. Keep away from sparks, flame and sources of ignition. Labels should not be removed from containers or drums. Do not allow this product to enter drains, sewers or water courses. Disposal must be by means of a licensed waste contractor.			
DISPOSAL METHODS Dispose of waste and residues in accordance with local authority requirements. Do NOT incinerate the container even when empty.
